Programming Assignment 1

P1.java

This program tests all of the Sym and SymTable operations.

It should only print the following text if there is no error.

```
1   === Sym Table ===
2
3   {}
```

Additional output is only produced if one of the methods that it is testing does not work as expected

Assumption: `Sym.java`, `SymTable.java`, `WrongArgumentException.java`, `DuplicateSymException.java` and `EmptySymTableException.java` are present in the same director as `P1.java`

Usage: javac *.java; java P1;
